System Improvement Plan 2023-2024

The Strait Regional Centre for Education Programs and Student Services team worked in consultation with principals, vice principals and teachers from across the region, who represented all grades, subject/speciality areas and years of experience, to develop a System Improvement Plan for the 2023-2024 school year. The establishment of the goals and priorities evolved from a comprehensive review of evidence of student learning, research and educational literature emphasizing the emotional, motivational and affective elements that need to be fostered in order to facilitate learning and develop the whole student.

The 2023-2024 System Improvement Plan is responsive to recent results in student achievement, as well as trends over time. It also represents an understanding of the important connection between student well-being and achievement, and the critical need to provide students with the conditions where all students feel a sense of belonging to achieve their full potential. All goals, priorities and implementation strategies have been developed through an inclusive, equitable and culturally responsive lens to ensure that all students have access to a variety of supports and services to facilitate greater success.

In addition, the System Improvement Plan aligns with the initiatives included in the [2023-2024 Department of Education and Early Childhood Development Business Plan](#).
